

MEADOWCROFT UK

BUILDING EXCELLENCE

BUILDING EXCELLENCE

Meadowcroft have been constructing fine properties across the North East for more than a quarter of a century. If you are planning to extend or refurbish your existing building, or build a new one, we can provide you with a very special service.

Our approach to construction is centred on providing an individual service, matched to the particular needs of our client. We will do our best to gain an understanding of your requirements and we will tailor our service to meet them. It's not a 'one size fits all' service. We work closely with clients, going the extra mile to ensure satisfaction and delight at the finished product.

Our team of craftsmen and professionals are experienced in all aspects of development and construction. We operate across the residential, commercial and industrial sectors, so we can advise you from the earliest stages of planning, ensuring your project is effective and efficient in meeting your needs. We have experience of the latest energy saving techniques and devices and we can advise you on the sustainability issues connected to your proposals.

As an award winning developer, having created schemes in some of the most sought-after locations in the North East, we are used to delivering exceptional service to discerning clients. We have a professional and non-confrontational approach to the construction process – if this is how you want to take your project forward we would be delighted to help.

Alasdair Hall manages our team and he is available on
